EDUCATION

Indian Institute of Technology Jodhpur

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.24)

Jodhpur, Rajasthan

Aug. 2024 – May 2028

Pace Junior Science College

Class XII – 91.17%

Thane, Maharashtra

2024

A.K. Joshi English Medium School

Class X – 97.00%

Thane, Maharashtra

2022

EXPERIENCE

Inter IIT Tech Meet 14.0

Dec 2025

Hosted by IIT Patna

- Developed a **2D platformer in Godot 4.5.1** for the GDAI problem statement at Inter IIT Tech Meet 14.0, securing **4th place in technical evaluation**.
- Architected a scalable **15-slot inventory system** supporting item collection, storage, interactions, and consumable-based progression mechanics.
- Implemented core gameplay systems including **UI components, player feedback loops, and 4+ audio integrations** to enhance usability and immersion.
- Designed and built **Level 1 of a 3-level game**, including layout design, item placement logic, and progression flow.

PROJECTS

AI Logistics Information Assistant [Demo](#) | *Python, LangChain, FAISS, Gemini API*

[GitHub](#)

- Engineered an Agentic RAG-based QA system using **LangChain, FAISS, and Gemini API**, enabling contextual retrieval over **5,400+ webpages and documents**.
- Built an automated ingestion pipeline processing **3,030+ webpages and 2,437+ PDFs** using BeautifulSoup, PyMuPDF, and Tesseract OCR for scanned data extraction.
- Implemented semantic search using HuggingFace embeddings with a **160+ MB FAISS vector store**, optimized with MMR-based retrieval ($k=20$, fetch $k=30$).
- Designed a robust retrieval pipeline with **3-second timeout handling**, query rewriting, metadata-based source attribution, and automated refresh system.

Mini Search Engine | *C++, Data Structures and Algorithms, Git*

[GitHub](#)

- Built a C++ search engine using an inverted index with **10,000+ word-position mappings** for retrieval across documents.
- Implemented ranked keyword + phrase search using frequency scoring, positional indexing, and binary validation in **$O(k \log k)$** query time.
- Developed a text normalization pipeline with **3 transformations (case folding, punctuation removal, quote handling)** and optimized lookups using unordered_map for **$O(1)$ average-time access**.

Puzzle-Chain | *C, File Handling, HTML, CSS*

[GitHub](#)

- Built a **4-level CLI puzzle game engine** with **36 questions across Easy, Medium, and Hard tiers**, enabling structured progression across levels.
- Implemented a **rule-based adaptive difficulty system (3 tiers per level)** with performance-based question selection and enforced failure/progression logic using a **3-attempt limit per level**.
- Developed an **automated HTML certificate generator in C** using file I/O, embedding the player's name and complete **4-level completion path (Level 1 → Level 4)**.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML, CSS, GDScript.

AI/ML: LangChain, RAG Pipelines, FAISS, Sentence Transformers, Gemini API, OCR.

Backend & Tools: Git, VS Code.

Libraries: NumPy, Pandas, Matplotlib, Plotly.

ACADEMIC COURSEWORK

Introduction to Computer Science: Grade A.

Data Structures and Algorithms: Grade A-.

Math for Computing: Grade B.

CAMPUS INVOLVEMENT & LEADERSHIP

Social Media Head: Respawn – Gaming and Esports Club.

Core Member: The Groove Theory – Dance Club.

Summer Project Member: Inside – Game Development Society.

ACHIEVEMENTS

Competitive Programming: Solved 2500+ coding problems across CodeChef, LeetCode(Rating 1588).
